neighborhood or in an open area or if there is a coyote den on your property.	
Private Nuisance Wildlife Professional	If you want a coyote removed from your
	property – State and local permits and
Phone: Check local listings	regulations apply

Coyotes are rarely dangerous to people. The key to living with coyotes is remembering that they are naturally afraid of people. The most effective way to prevent a bad encounter with a coyote is to reinforce this natural fear through your behavior. If a coyote is seen in its natural habitat, it is fine to watch it from a distance. Coyotes are often seen in neighborhoods near natural areas. Never approach a coyote, let your dog approach it, or feed it. If you are approached by a coyote, or it comes into your yard, scare it away by shouting at it and waving your arms over your head. Using an air horn or whistle will also help scare coyotes away from approaching you. These actions will reinforce the coyote's natural fear of people and teach it that your yard is not available territory.
